21. **New / Old Business**

As part of Sewickley Township’s clean storm water program, we would like to remind everyone that our storm water inlets, curbs and gutters, drainage ditches and storm pipes discharge into the Sewickley Creek or the Youghiogheny River which are used for fishing, boating, and swimming. In order to help improve the quality of our river and creek, we remind residents and businesses to please do not discard grass clippings, used oil, paints, solvents, or other wastes into the storm drains. Maintain the grass height in your yard at no less than three (3) inches. Longer grass is healthier, retains more moisture, and requires less fertilizer. If using fertilizers or pesticides, always follow the directions and never apply immediately before a rainstorm. If draining your pool, allow your pool to dechlorinate first by keeping it uncovered and waiting at least ten days after its last chlorination to allow the chlorine to dissipate in the air. Then have the pool drain into a grassy area. Pick up after your pet. Don’t let pet waste lie in the streets or alleyways where they can get washed into the storm drain. Wash your vehicle in an area where the dirty wash water will not run directly into a storm inlet. Preferably, wash your vehicle at a car wash or in a grassy or gravel area. Properly dispose of used motor oil, oil-based paints, solvents, household cleaners, and other hazardous household chemicals. We remind residents and businesses that it is illegal to dispose of these chemicals in the Township’s storm inlets. Go to www.dep.pa.gov/stormwatermgmt for more information. Together we can protect and preserve a very important resource of our community.

22. With no further business to come before the Board, motion to adjourn.
